

CHIROPRACTIC CONSULTING DISCLAIMER

The Congruent Consulting technology is a system of health-success methodologies which includes the finding and removing of neurological aberrations called Neuro Emotional Complexes (N.E.C.s) in the human organism. N.E.C.s have, as a component part, a spinal subluxation. These aberrations have, as a component part, specific emotional neurophysiological patterns. The technology ultimately is a methodology of making rational and physiologically emotional functions congruent via spinal adjustments.

Emotions are physiologically based functions which normally do not present any neurophysiological problems. Occasionally, emotional trauma in the presence of neurological deficit (lowered resistance) causes a neurological pattern (N.E.C.) in the body which does not resolve of itself. The result is an embodied non-extinguished conditioned response. These old, unresolved responses interfere with the central nervous system's ability to function properly in various everyday recreational and workplace situations.

The Congruent Chiropractic Consulting technology seeks to normalize this pattern by spinal adjustments which in turn affect a physiological change, resulting in a new ability to utilize your own success concepts.

Emotions also have a psychological aspect. However, this technology is not psychology or psychiatry. It does not involve any type of psychotherapy or a "talk-it-out" approach to emotions. Psychological aspects of emotional health will be referred out to appropriate health care professionals, such as a psychologist or psychiatrist.

Additionally, this technology does not deal with the spiritual realm. It does not exorcise demons or entities. It does not predict the future or deal in any way with the occult or parapsychology. It does not make claims as to what events may have historically happened in the past. It does not tell people what their psychological plan of action may, must, or should be for the future.

To present, there have been no formal scientific protocol studies completed that validate the efficacy of this technology. The value is to be determined by the client utilizing the technology, ideas and concepts of the doctor.

In addition, the services provided by the attending doctor are considered "elective" procedures and are not reimbursable by insurance companies. Should an insurance company be mistakenly billed for these services, it is likely a letter will be sent to the doctor requesting a report of service. The Doctor will reply that the services rendered was elective in nature and attach a copy of this disclaimer.

I have read this and consent to the concepts and disclaimers presented above.
